The Hidden Risks in Battery Collection

As a responsible retailer dealing with battery collection, you face unique challenges:

- ⌘ Potential for battery explosions or fires in high-traffic areas
- ⌘ Risk of toxic gas emissions contaminating products
- ⌘ Long-lasting brand damage from safety incidents
- ⌘ Customer hesitation to return after safety scares

In addition to these risks, insurance companies may refuse coverage for e-bike stores, or increase insurance rates significantly if there is no demonstrated risk mitigation in place. ENVAION can help reduce these risks, making it easier to secure insurance and maintain manageable rates.

ENVAION's Solution: Beyond Safety, Protecting Your Brand

Our innovative AkkuGrain technology offers more than just fire prevention:

- ⌘ Active fire risk reduction and explosion containment
- ⌘ Effective Containment of Hazardous Heat
- ⌘ Neutralization of toxic gases
- ⌘ Peace of mind for your customers and staff

 Safety by AkkuGrain™

Key Benefits for Retailers

Battery hazards can compromise air quality and product safety—especially in food retail. ENVAION's solution ensures a safe, contamination-free environment, keeping your merchandise and customers protected.

ENHANCED CUSTOMER TRUST:

- ✂ Create a safe environment for Lithium-ion battery drop-offs
- ✂ Enhance your brand reputation - Adopt a professional approach to battery collection
- ✂ Encourage repeat visits with visible safety measures

OPERATIONAL CONTINUITY AND COST SAVINGS:

- ✂ Ensure Business Continuity -
Protect your store from the risk of closure following a battery-related incident
- ✂ Prevent potential product loss, particularly critical in food and perishables retail
- ✂ Maintain smooth operations and customer flow

COMPREHENSIVE BRAND PROTECTION:

- ✂ Prevent incidents that could tarnish your brand image
- ✂ Safeguard products from contamination, crucial for food and sensitive goods retailers
- ✂ Demonstrate commitment to customer safety and environmental responsibility

REGULATORY COMPLIANCE AND RISK MITIGATION:

- ✂ Stay ahead of safety regulations for battery handling
- ✂ Reduce liability risks associated with battery collection
- ✂ Protect staff and customers from exposure to potential hazards

Our Retail-Optimized Product

	Certified	External Dimensions (L x W x H)	Internal Dimensions (L x W x H)	Content Weight (Batteries)
 <p>VIO-8 Pro Perfect for retail needs</p>	P911 UN 4H2/X US DOT Special Permit DOT-SP-21619	600 x 800 x 740 mm 24" x 32" x 29"	405 X 605 X 500 mm 16" x 24" x 20"	Up to 200 Kg

FEATURES:

- ✧ Easy forklift loading & secure locking
- ✧ One-hand operation with pneumatic
- ✧ lifting & lockable lid
- ✧ Integral skids for easy tipping
- ✧ Detachable lid for efficient unloading
- ✧ Stackable up to three high, for optimal truck load
- ✧ Ticket holder for content tracking
